

Eco buddies

What have we achieved so far:

Nominated and voted for our new class eco buddies.

We have purchased litter pickers so that all of our school community can assist with looking after our school.

Created an interactive display for recycling to make all of our school community aware of what and how we can recycle.

What are our aims for 2016/2017:

Introduce recycling bags or bins for each classroom.

Work with outside agencies to promote recycling throughout the school.

Ensure that we have a good litter picking system in place involving all members of our school.

Assist the science team and school cook with planting our own vegetables in a new planting area.
