

Eco buddies

What we achieved in 2016/2017

Nominated and voted for our new class eco buddies.

We have purchased litter pickers so that all of our school community can assist with looking after our school.

Created an interactive display for recycling to make all of our school community aware of what and how we can recycle.

Work with outside agencies to promote recycling throughout the school.

Ensure that we have a good litter picking system in place involving all members of our school.

What are our aims for 2017/2018:

Introduce recycling bags or bins for each classroom.

Assist the science team and school cook with planting our own vegetables in a new planting area.
